Legend

Fuel Dryness

| | |
|-----------------|---|
| Moist | - Little or no risk for Large Fires |
| Dry | - Low risk for Large Fires in absence of a High Risk Trigger. Large Fire risk can elevate to critical levels with a High Risk Trigger. |
| Very Dry | - Moderate risk for Large Fires in absence of a High Risk Trigger. Large Fire risk can elevate to critical levels with a High Risk Trigger. |

High Risk Days

| | |
|---------------|---|
| red | Forecaster feels there is a 20% or greater threat of a large fire due to dry fuels and a significant number of ignitions (significant ignition trigger). |
| orange | Forecaster feels there is a 20% or greater threat for a new large fire or for significant growth on an existing large fire due to critical burning conditions (dry with a significant weather trigger). |

Potential High Risk Triggers

| | |
|----------|--|
| N | Abundant Lightning (ignition trigger) |
| U | Significantly unstable airmass (weather trigger) |
| W | Significantly Windy (weather trigger) |
| R | Heavy Recreation (ignition trigger) |
